

# 1979 Peterbilt 359

## AUCTION ITEM

3123

## SERIAL

11280P

## FEATURES

36" Unibilt flattop sleeper  
8" exhaust pipes  
Big Texas boltless bumper

### *From the seller:*

"I bought this truck almost five years ago. I had just stopped hauling cattle all over the U.S. for a local trucking company. I got a new job working for the Union Pacific Railroad, met a girl and was starting to settle down a bit. Then, I thought if I bought an old truck I could make some extra money hauling corn at harvest time for my mom."

"I knew I wanted an old Peterbilt. I found this 1979 359 short hood. It had a 63" flat top, 6" straight pipes and an old school paint job. What more could you ask for?"

"I got married and my wife sent my name in to a TV show, and they called back. She got my cool old truck redone for me. Needless to say, the TV show guys didn't think it was as cool as I did, so they rebuilt it for me from the floor up."

"They put on a 36" Unibilt flattop sleeper, installed all new interior, new seats and a stereo. Then, on the outside, they really went crazy with new paint, tires, wheels, 8" straight pipes, big Texas boltless bumper and big single headlights like an old 30's car. It really turned out cool."

"I bought it home and pulled my cousin's 44-foot race car trailer around most of the summer. Man, does it catch peoples' eyes when they see you coming down the road. We took it to some local parades and car shows. People really like this truck."

"It came back around to corn harvest time and I had to put her back to work. Now, I need to sell the old girl before I tear her up and get me a different old truck to tinker with."
